

Hamburg Quantum Innovation Capital

Combined expertise in quantum technology
from research to application

Artificial Intelligence Center Hamburg (ARIC) e.V.

AI- & Quantum-Technology

ZUKUNFTS
ZENTRUM
NORD

Regional Future Center North, RZ. North:

Advice and assistance on the application of AI in SMEs and public institutions

European Digital Innovation Hub, EdiH (EU):

Network of Excellence Hub; Implementation of prototypes 'test before invest'

AI.STARTUP.HUB

AI STARTUP HUB HAMBURG:

One of five nationwide model regions for the promotion of AI startups

hqic

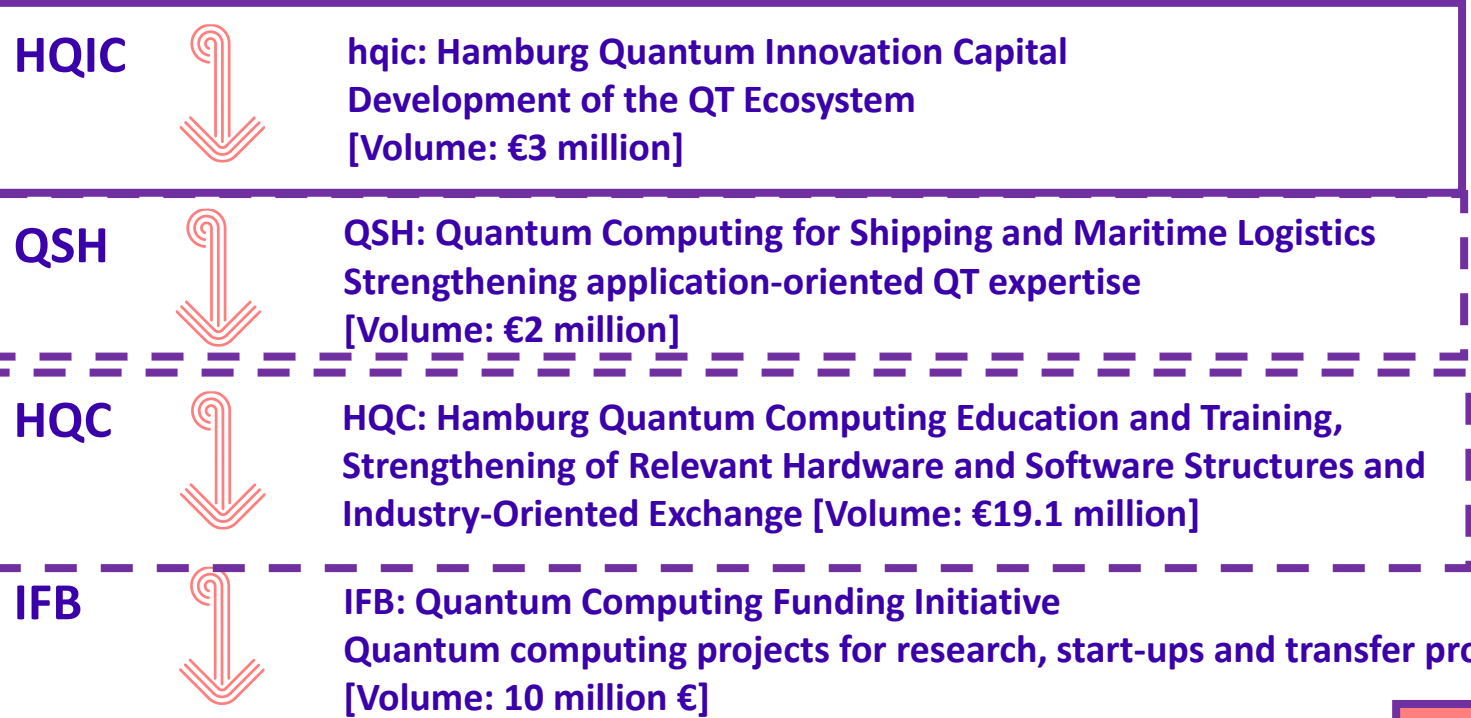

Hamburg Quantum Innovation Capital, hqic:

Systematic expansion of Hamburg as a location for quantum economy

Co-funded by
the European Union

Development of the QT site in Hamburg

Total volume FHH: € 34.1 million

QCI

DLR: Quantum Computer Initiative
Construction of various Systems based on ion traps +
approx. 10 project assignments with companies and start-ups from the quantum metropolis of Hamburg
[Volume: €208.5 million]

Hardware Architectures

- The QT/QC site encompasses multiple hardware architectures, which underpin the integrated co-design of hardware and software tailored to each architecture.
- This foundational setup enables comprehensive development of hardware, software, applications, and essential enabling technologies at the site.

Development of the QT site in Hamburg

HQIC

hqic: Hamburg Quantum Innovation Capital
Development of the QT Ecosystem
[Volume: €3 million]

QSH

QSH: Quantum Computing for Shipping and Maritime Logistics
Strengthening application-oriented QT expertise
[Volume: €2 million]

HQC

HQC: Hamburg Quantum Computing Education and Training,
Strengthening of Relevant Hardware and Software Structures and
Industry-Oriented Exchange [Volume: €19.1 million]

IFB

IFB: Quantum Computing Funding Initiative
Quantum computing projects for research, start-ups and transfer projects
[Volume: 10 million €]

Total volume FHH: € 34.1 million

QCI

DLR: Quantum Computer Initiative
Construction of various Systems based on ion traps +
approx. 10 project assignments with companies and start-ups from the quantum metropolis of Hamburg
[Volume: €208.5 million]

Total funding: approx. € 95 million

(QT package of measures + QT research projects) FHH

Funding Landscape Quantum Metropolis Hamburg

Total:

- Funding period: 2020-2028
- Budget: approx. € 125 million
- Projects: 21

Examples Research Overview QT in FHH

Quantum Base Technologies:

Quantum Hardware, Software, Simulation and Cryptography

Quantum materials:

new properties for technological applications through quantum effects

Quantum communication:

tap proof communication networks

Quantum sensor:

higher precision and sensitivity for applications in medicine, navigation,...

Quantum computers:

exponentially fast factorization of large numbers and search in unsorted databases

over 12 projects;
€ 77.9 million

FLATBAND, SURQUID, QUANCER;
€11.9 Mio.

Quantum HiFi; Development of practical, stable quantum communication networks with high data rates;
€1.85 million; Start 07/2022

TIMES PhD Network; 10 universities; Application in photovoltaics, optoelectronics, superconductivity; €2.6 million; Start March 2024

LINOBUS (lithium tantalate waveguide) and Qusied (simulaiton many-atom tweezer cavity platforms)

Application of exponentially fast factorization of large numbers!

Quantencomputer

Safety:

- **Encryption systems** (e.g. RSA) use prime numbers to generate secure keys.
- **Secure data transmission** (e.g. online banking) uses prime numbers for encryption.
- **Blockchain and cryptocurrencies** are based on cryptographic methods with prime numbers.
- **Digital signatures** use prime numbers to ensure the authenticity of documents.

- **Random numbers:** Prime numbers play a role in generating high-quality random numbers for security applications.
- **Network security:** Protocols such as SSL/TLS for secure web connections use prime number-based cryptography.

Bitkom legt Zahlen vor

206 Milliarden Euro Schaden durch Cyberkriminalität

Stand: 01.09.2023 13:35 Uhr

Durch Diebstahl von IT-Ausrüstung und Daten sowie durch Industriespionage und Sabotage entstehen der deutschen Wirtschaft dieses Jahr 206 Milliarden Euro Schaden. Das ergab eine Bitkom-Umfrage. Immer mehr Attacken kommen aus Russland und China.

Meet us...

AI & QUANTUM *Mix & Mingle*

Monthly Meetup
For everyone interested in AI

& QUANTUM

@Zoe II ("Sofabar")

Next date:
26.3.

from 6:30 pm

Every last Tuesday of the month from 6:30 p.m. to 9 p.m. we meet at the ZOË (Neuer Pferdemarkt 17, Hamburg Sternschanze) to the Mix & Mingle.
